

Dissolve Fats, Oils and Grease.

Proprietary deFOG microbes cure the root cause of SSOs and residential backups. F.O.G. (fats, oils and grease) accumulation is notorious for constricting pipe flow and clogging lift stations. The powerful microbes in our deFOG products excel at digesting F.O.G. They displace wild bacteria, creating a persistent slime layer capable of combatting F.O.G. in a sustainable, eco-friendly manner.

Symptoms:

- SSOs
- Residential Backups
- Clogged Lift Stations
- Excessive Jetting

Diagnosis:

- F.O.G. (fats, oils & grease)

Treatment:

Start a pilot project with a FREE system analysis and treatment plan.
