

Neutralize H₂S and Mercaptans.

sulFadé molecular neutralizer cures the root cause of odor complaints and pipe deterioration. Hydrogen sulfide accumulation in lift stations and force mains leads to odor complaints, toxic exposure for sewer workers, and premature pipe failure due to sulfuric acid corrosion. The proprietary chemistry of sulFadé breaks down hydrogen sulfide and mercaptans, yielding harmless effluent.

Symptoms:

- Odor Complaints
- Pipe Corrosion
- Toxic Exposure Risk

Diagnosis:

Sulfides & Mercaptans

Treatment:

Start a pilot project with a **FREE** system analysis and treatment plan.
