

# Haaker Equipment Company

## Jobsite Communications Setup Checklist

- Assign headsets to each team member and test audio levels
- Ensure all headsets are fully charged before shift start
- Confirm Bluetooth pairing with phones or devices (if needed)
- Conduct a pre-job comms check-in using Sonetics system
- Train crew members on full-duplex communication protocols
- Verify noise cancellation and hearing protection are active
- Ensure secure headset fit for each user with PPE
- Test range between users across jobsite zones
- Integrate with existing radio or dispatcher systems (if applicable)
- Contact Haaker Equipment Company for setup or troubleshooting
